

# Pre-Event Medical Screening Checklist

Use this checklist to assist in identifying potentially communicable diseases before event participation.

The intent of this checklist is to review with each youth and adult participant their current health status, both before departure and upon arrival at the event. Anyone entering a camp or event — including visitors, vendors, etc. — should be screened using this checklist.

- Yes  No Within the last 14 days, have you had contact with anyone who has COVID-19?
- Yes  No Have you or anyone you have been in close contact with traveled on a cruise ship, internationally, or to an area with a known communicable disease outbreak in the last 14 days?

***If the answer is “yes” to either of these questions, the participant must stay home.***

- Yes  No Are you in a higher-risk category as defined by the CDC guidelines?  
If the answer is “yes” to this question, we recommend that you stay home. Should you choose to participate, you must have approval from your healthcare provider and then proceed to the symptom decision tree below.

***If the above answers are “no,” proceed to this symptom decision tree.***

- Shortness of breath
- New or worsening dry cough
- Fever of 100.4° or greater
- Flu-like symptoms
- Vomiting
- Diarrhea
- Loss of taste or smell

NONE

- Cough
- Unexplained extreme fatigue or muscle aches
- Rash
- Sore throat
- Open sore

YES to any ONE symptom

YES to any TWO or more symptoms

**THE PARTICIPANT MUST STAY HOME**  
These symptoms are associated with communicable diseases and the participant **MUST** stay home until medically cleared by their health care provider.

COVID-19 Risk Acknowledgement

The safety of all Scouts, volunteers and staff is the Capitol Area Council's top priority.

Our council leaders continue to review national, state, and local health department recommendations to ensure we comply with their guidance to mitigate the risks of COVID-19 being contracted at our camps and facilities.

Our mitigation plan includes:

- Pre-attendance education.
- Health screening conducted by your unit prior to travel to our camp, including a temperature check.
  - o Note: See Pre-event Medical Screening flow chart.
- Health screening upon arrival at camp on all persons that enter camp. This screening will be conducted by our camp health officers, which will also include a temperature check. If anyone in the unit does not pass the arrival screening, the entire unit will not be allowed to enter camp.
- Limiting visitors in camp. (Parents should drop Scouts at camp parking lot and not enter camp)
- PPE Requirements: Masks must be worn in buildings and when 6-foot distancing cannot be observed.
- Extra handwashing/sanitizer stations throughout camp.
- Enhanced cleaning and disinfection of high-touch surfaces and shared program equipment.
- Food Service Protocols to stop potential spread of bacteria and virus.
- An emergency response plan that includes an isolation and quarantine protocol should a person at camp develop symptoms of COVID-19 or other communicable disease.

Experts have said that people with COVID-19 may show no signs or symptoms of illness, but can still spread the virus, and people may be contagious before their symptoms occur. The fact is that someone with COVID-19 may pass the required health screenings and be allowed into camp. We also know the very nature of camp makes social distancing difficult in many situations and impossible in others.

Information from the Centers for Disease Control and Prevention (CDC) states that older adults and people of any age who have serious underlying medical conditions are at higher risk for severe illness from COVID-19. If you are in this group, please ensure you have approval from your health care provider prior to attending camp.

Every staff member, volunteer, and Scouting family must evaluate their unique circumstances and make an informed decision before attending camp. We hope this information will be helpful as you make that choice.

I understand that there is risk due to the contagious nature of COVID-19 and that the protocols outlined above constitute reasonable barriers to mitigate that risk.
